Rick Log

Project- SpectroGuard

Risk ID	Risk	WBS Ref	Probability	Impact	Score	Mitigation	What Happened	Action Taken	Occurred?	Date	Final Status
R1	Password model not learning patterns while training	3.1, 3.2, 3.3	**3**	**4**	**12**	Check and optimize data set before training	Password model was not able to learn patterns, which caused predictability issue	Changed data set and optimized it according to the higher order	**Yes**	29-Nov-25	Closed
R2	URL model accuracy under target	4.1, 4.2, 4.3	**3**	**5**	**15**	Check data set and train-test split before training	Accuracy was not up to the target (93%+)	Retrained the URL model with more data	**Yes**	07-Jan-26	Closed
R3	Phishing model file corrupted	5.1, 5.2, 5.3	**2**	**4**	**8**	Keep backups and version control for trained models	Phishing model was not able to fetch features from a website	Restored model from Google Drive. Backup was an older version, so modified it to work with current Python version (3.14.3)	**Yes**	23-Feb-26	Closed
R4	Python version may not match the backend	8, 9	**2**	**2**	**4**	Check version requirements for development and keep track of them	Not applicable	Not applicable	No	Not applicable	Not occurred
