ID	Risk	Probability	Impact	Owner	Mitigation
R-01	Ransomware infection returns during recovery	**Medium**	**Critical**	Arjun	Restore systems separately, scan them for threats, and get approval from the Security Team before reconnecting them.
R-02	Backup restoration fails	**Medium**	**High**	Priya	Check backups before restoring them. Keep another backup ready in case the first one fails.
R-03	Customer portal recovery misses deadline	**High**	**High**	Rohan	Focus on restoring the customer portal first. Track progress and inform the Incident Commander if there is a delay.
R-04	Important company data cannot be fully recovered	**Medium**	**Critical**	Priya	Check restored files and data. If anything is missing, check other backups and record the problem.
R-05	Recovered systems fail security testing	**Medium**	**High**	Aisha	Test recovered systems before making them live. If any test fails, fix the issue and test again.
